PROFESSIONAL PROFILE

Computer Engineering student focused on building full-stack web applications, real-time systems and polished user interfaces. Hands-on experience across React, Next.js, TypeScript, Supabase, MongoDB, Python and SQLite, with projects spanning live classroom scoring, AI-assisted data processing, commercial websites and database-driven applications.

TECHNICAL SKILLS

HTML5	CSS3	JavaScript
TypeScript	React	Next.js
Tailwind CSS	Three.js	Python
C	C++	Java
SQL	SQLite	MongoDB
Supabase	Git	GitHub
Vite	PyQt6	Figma
Framer Motion	GSAP	REST APIs

SELECTED PROJECTS

LiveVote — Realtime Classroom Scoring | COMPLETED

React · TypeScript · Vite · Tailwind · Supabase Realtime

- Built a live presentation-scoring platform where hosts create rooms and participants join using a code and score presentations from 1–10.
- Implemented participant presence, host-controlled voting, vote locking, dynamic leaderboards, podium views, sorting modes and Excel reporting.

github.com/vatsaltank28/LiveVote

NaCl Community Platform | IN PROGRESS

Next.js 15 · TypeScript · MongoDB · NextAuth · Stripe · Three.js

- Building a full-stack community and events platform with interactive 3D visuals, authentication, event discovery and admin workflows.
- Developing event management, payment/webhook handling, order status management and admin statistics with reusable responsive UI.

github.com/vatsaltank28/NaCl_community_stories

MixCulture Pizzeria — Client Website | LIVE WEBSITE

HTML · CSS · JavaScript · Responsive UI/UX

- Developed a customer-facing restaurant website covering menu presentation, brand storytelling, reviews, galleries, location and ordering calls to action.
- Applied responsive layouts and UI/UX principles to deliver a polished experience across devices.

mixculturepizzeria.com

Inventory Management System | COMPLETED

Python · PyQt6 · SQLite · Data Structures

- Built a desktop inventory system with authentication, search, stock management and database-backed operations.
- Applied BST indexing, dictionary lookup, undo stacks, FIFO stock queues and supplier–item graph relationships.

github.com/vatsaltank28/Inventory_Management_System

Library Management System | COMPLETED

Python · SQLite · CLI · Authentication

- Implemented role-based access, book and borrower records, borrowing history and activity logging.
- Added SHA-256 password hashing and automated tests for core workflows.

ADDITIONAL PROFESSIONAL WORK

AgriNova AI — Agriculture dashboard prototype covering weather, field mapping, irrigation, crop health, market information and chatbot access.

British Brewing Company — Professional hospitality website concept; not officially deployed by the business.

EDUCATION & INVOLVEMENT

Computer Engineering — SVKM's Shri Bhagubhai Mafatlal Polytechnic, Mumbai | Sept 2025 – Present

MHT-CET 2025 — 94.62 percentile

Sankhya (Maths Committee) — Co-Committee Member | 2025 – Present
